This 5 port Fast Ethernet switch has four 10/100M UTP ports and one 100M SC socket. It converts optical/electrical Ethernet signals between 10/100M UTP ports and 100M optical fiber ports. It extends the transmission distance of a network from 100 m over copper wires to up to 120 km through optical fiber link. In addition, LED indicator lights fully monitor the convertor's operational status making observation and diagnoses easy.
