### 8-P Gigabit Ethernet Switch

This device is a powerful and high-performance 10/100/1000Mbps Gigabit Ethernet switch with 8 \* 10/100/1000Mbps Gigabit Ethernet ports. Moreover, it provides a backbone link to your switched workgroup or a server fat-pipe link. With such flexible architecture, users can easily plan the network without bandwidth and media limitation.

With 16Gbps switch bandwidth, the switch is fully non-blocking architecture can support every switching port wire-speed performance. Compared to the shared 10/100/1000Mbps networks, the switch delivers a dedicated 10/100/1000Mbps connection to every attached client with no bandwidth congestion issue. Store-and-forward switching mode promises the low latency plus eliminates all the network errors, including runt and CRC error packets.

The switch provides half and full-duplex capability on all ports to boost bandwidth for servers and power users and is fully compliant with all kinds of network protocols. Moreover, the rich diagnostic LEDs on the front-panel provide the operating status of individual port and whole system.
